

SS 2012

# Autonomous Mobile Systems

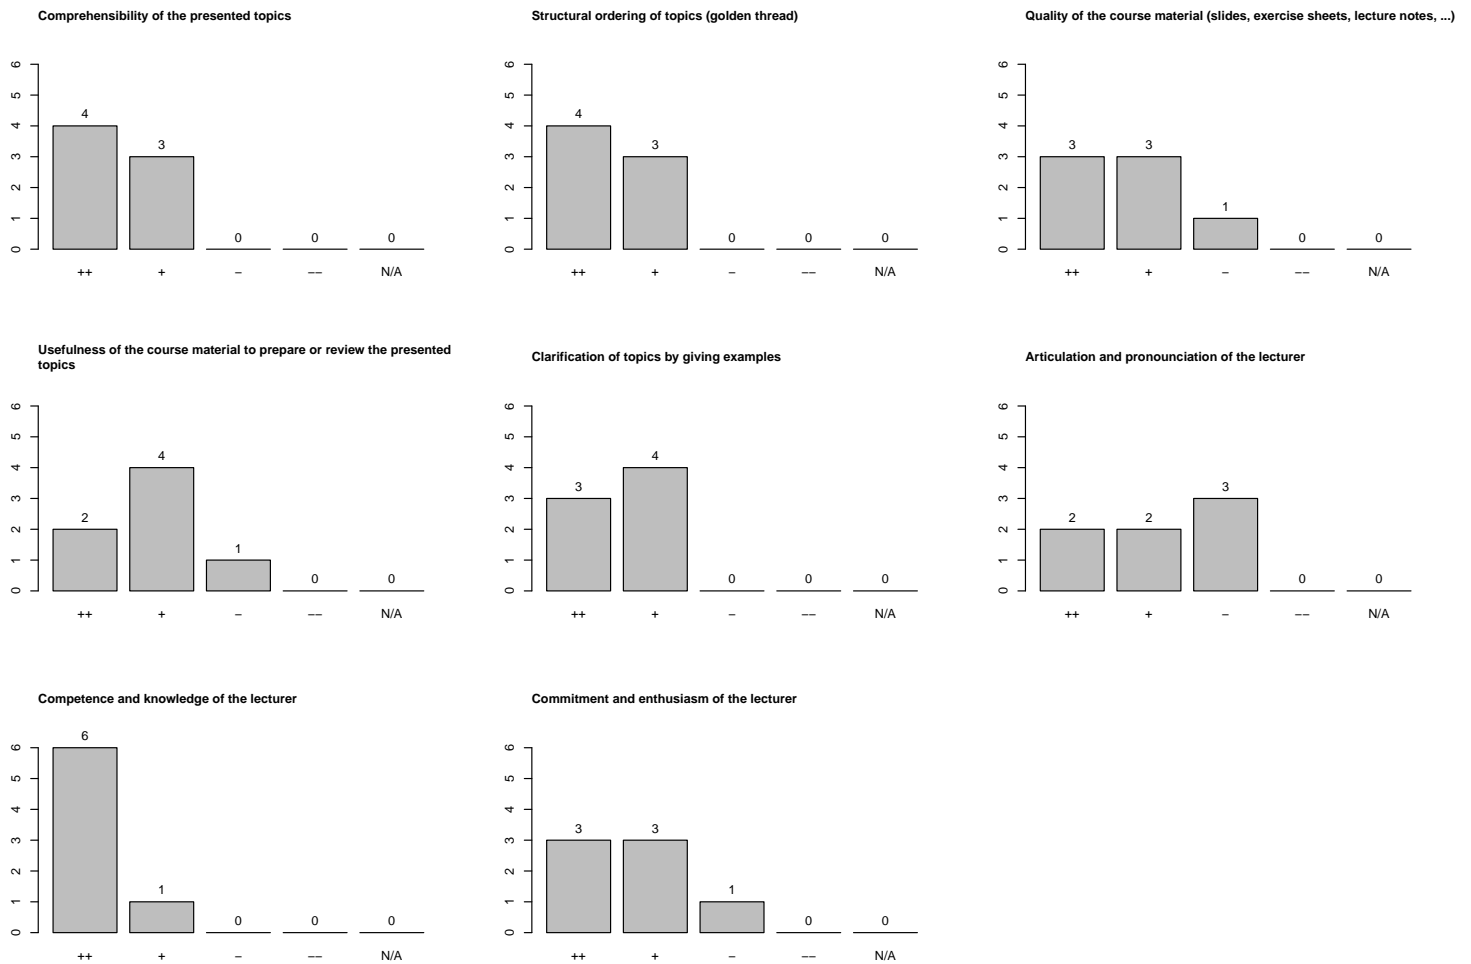

DIRK SCHULZ

Average grade: 2

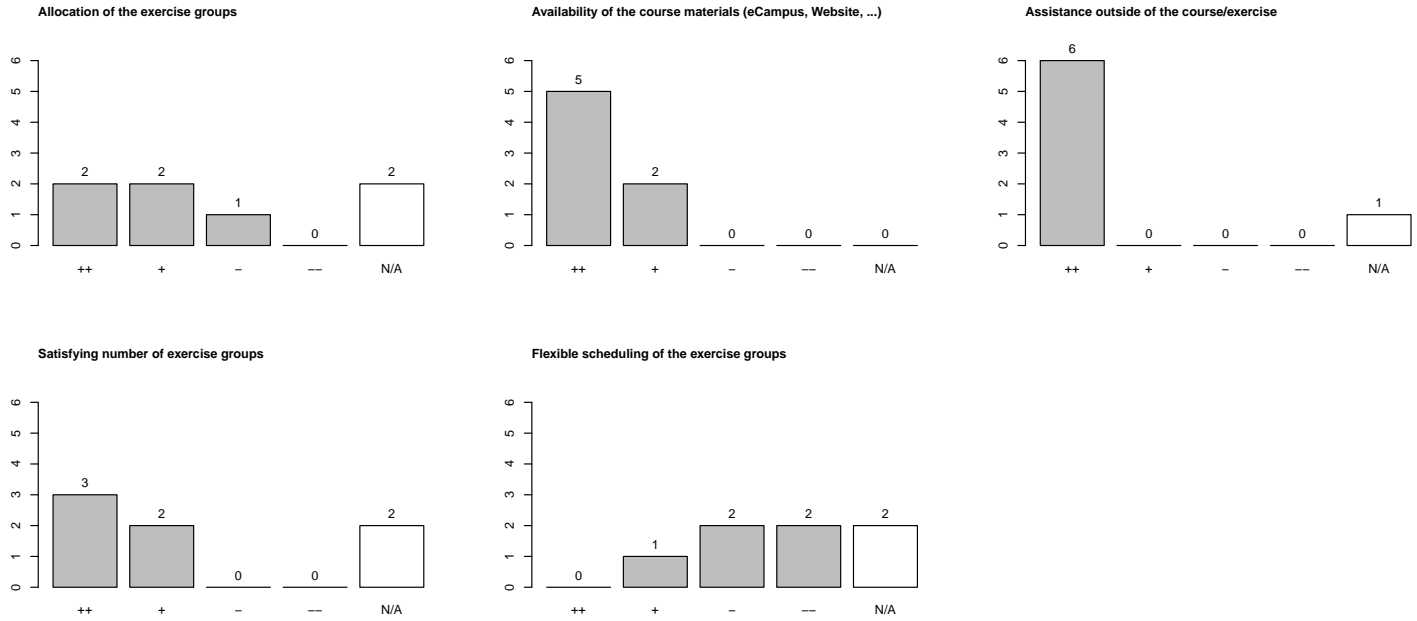

Participants (evaluated survey sheets): 7

- Bachelor: 1
- Master: 5
- Diploma: 1
- Lectureship: 0
- Minor subject: 0
- FFF: 0

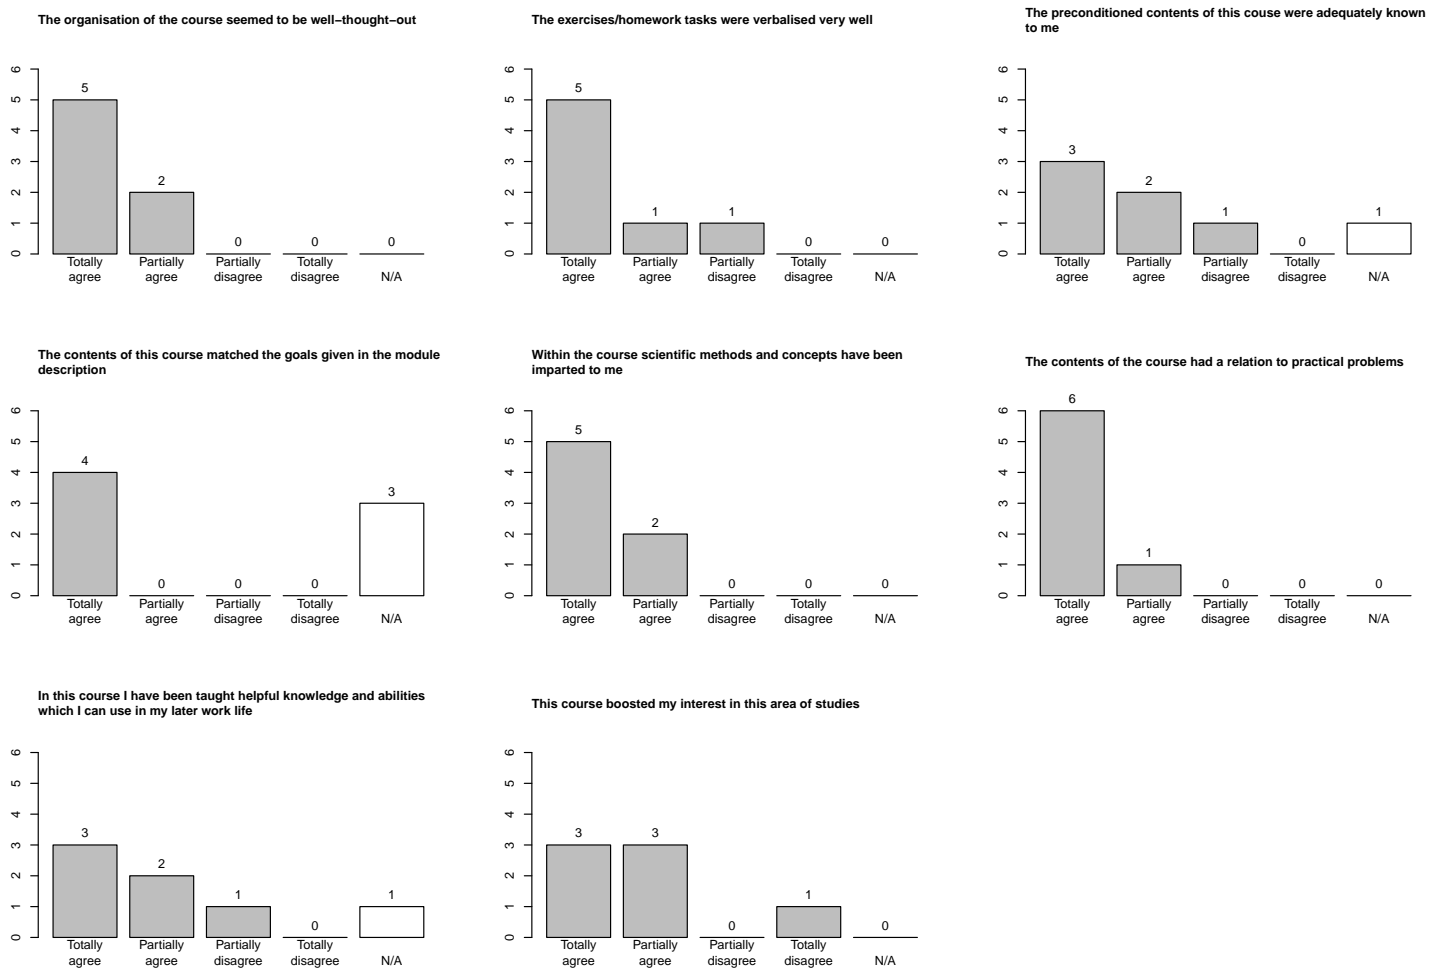

## 1 Please rate the quality of the lecturer's teaching.

## 2 Please rate the organisation of the course.

## 3 Please rate how the following statements fit your opinion.

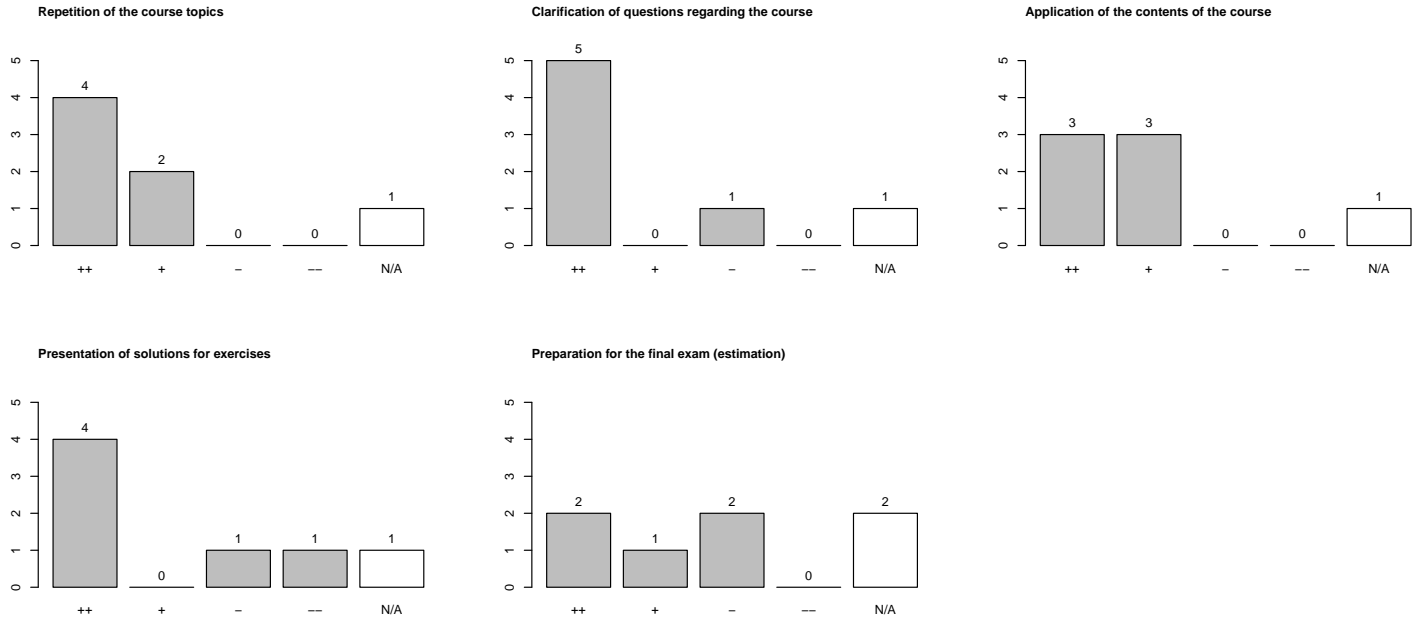

#### 4 Please estimate the effort and complexity of this course.

#### 5 How many hours per week did you spend on this lecture (including the visit of the lecture and exercise groups) on average?

## 6 Please assess the value of the exercise groups to help understanding the presented topics.

## 7 Please rank the size of the rooms and exercise groups.

## 8 Please compare your interest in the topics of the course before and after visiting the course.

9 Please give an overall rating of the course on a scale from excellent (1) to very poor (6).

## 10 Comments

Which things of the course did you like?	What could be improved?	You can leave remarks and feedback to our survey here.
I liked the practical aspects of the lecture. For all theoretical topics the practical sense were always clear.	I disliked the change of the lecturer at some points of the lecture.	
Only a small group of students was in the lecture, so the assistance was very good.	There was only one timeslot for the exercise. The timeslot for the lecture (friday morning!) seems not to be liked by students.	
Topics	Page numbers on the slides!	:-)
Topics, Content	Lectures (lecturer should be more fluent and better prepared)	
		Too much overlap with "Cognitive Robotics"
	The lecturer sometimes didn't speak loud enough
