

WS 2012/2013

Advanced Topics in Information Systems: Information Retrieval

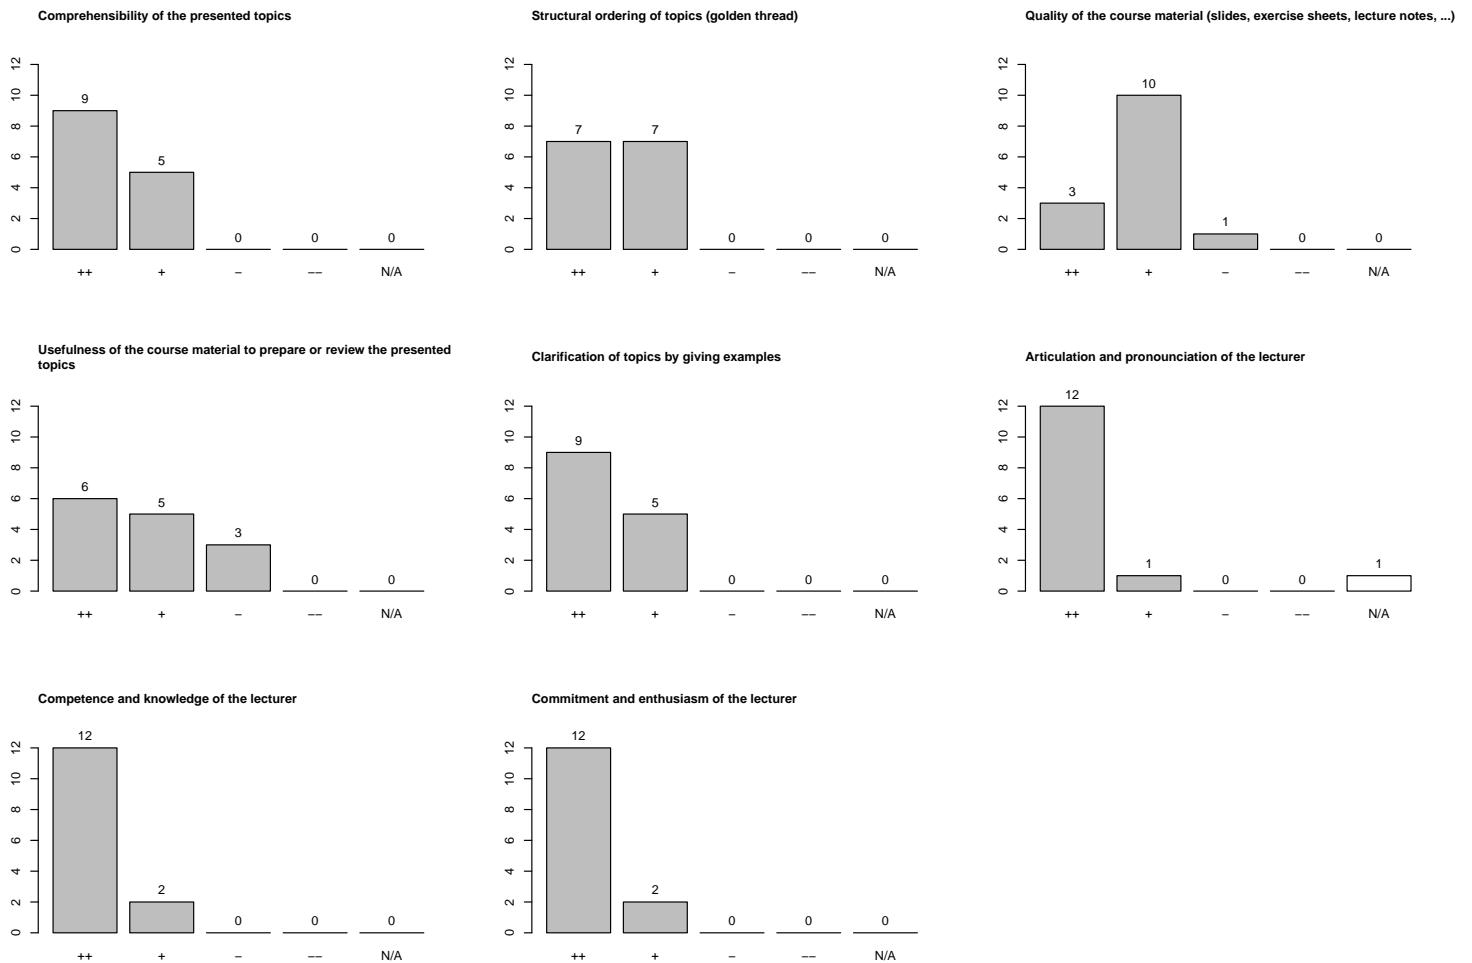

JUN.-PROF. DR. ALEXANDER MARKOWETZ

Average grade: 1.4

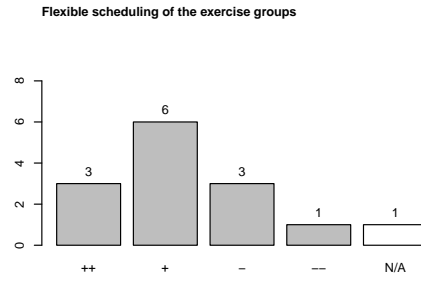

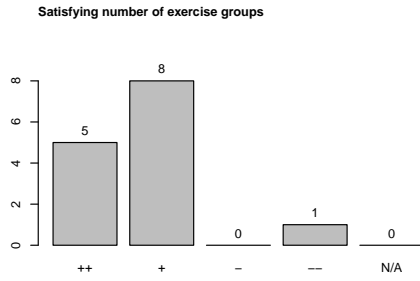

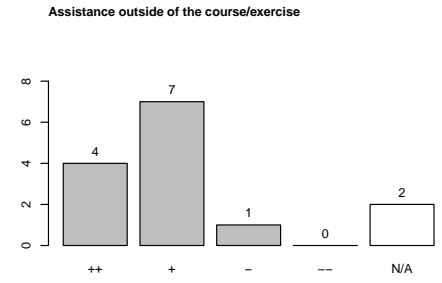

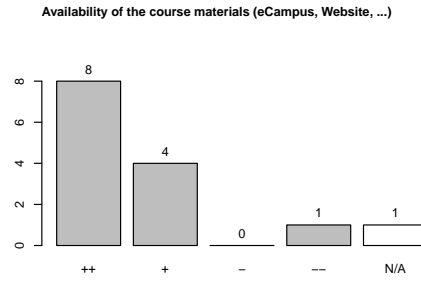

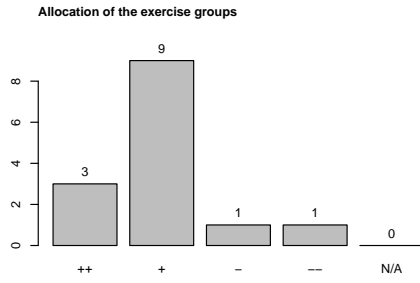

Participants (evaluated survey sheets): 14

- Bachelor: 0
- Master: 14
- Diploma: 0
- Lectureship: 0
- Minor subject: 0
- FFF: 0

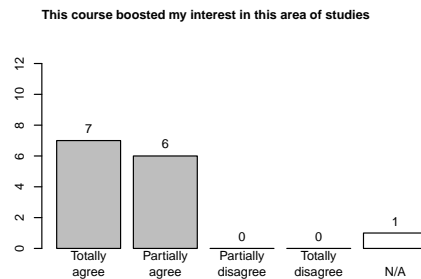

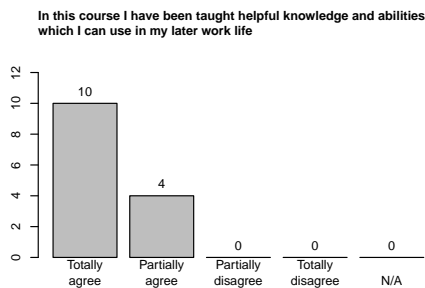

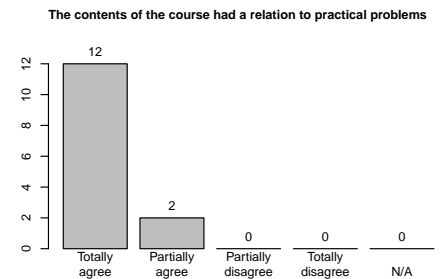

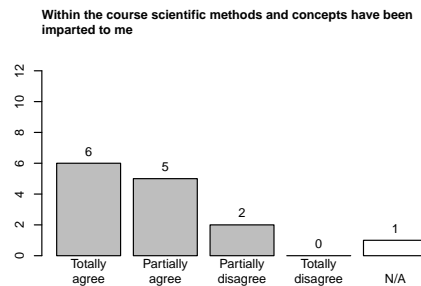

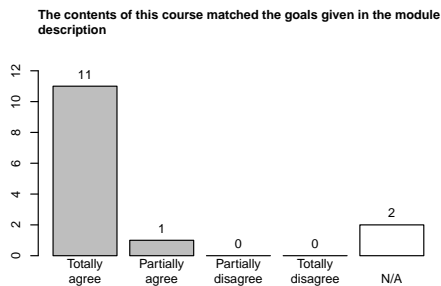

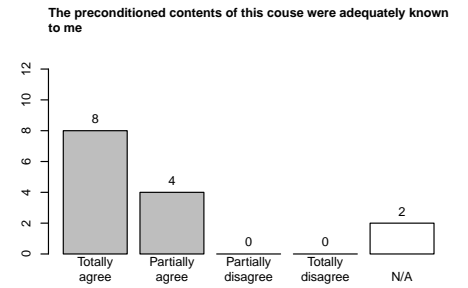

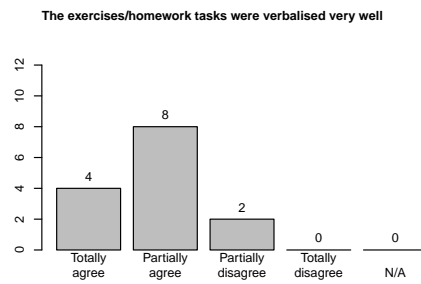

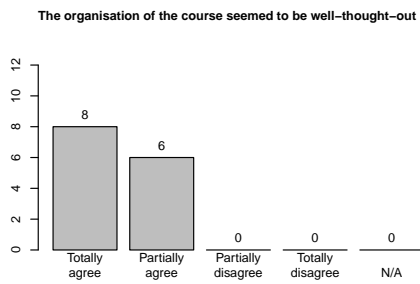

1 Please rate the quality of the lecturer's teaching.

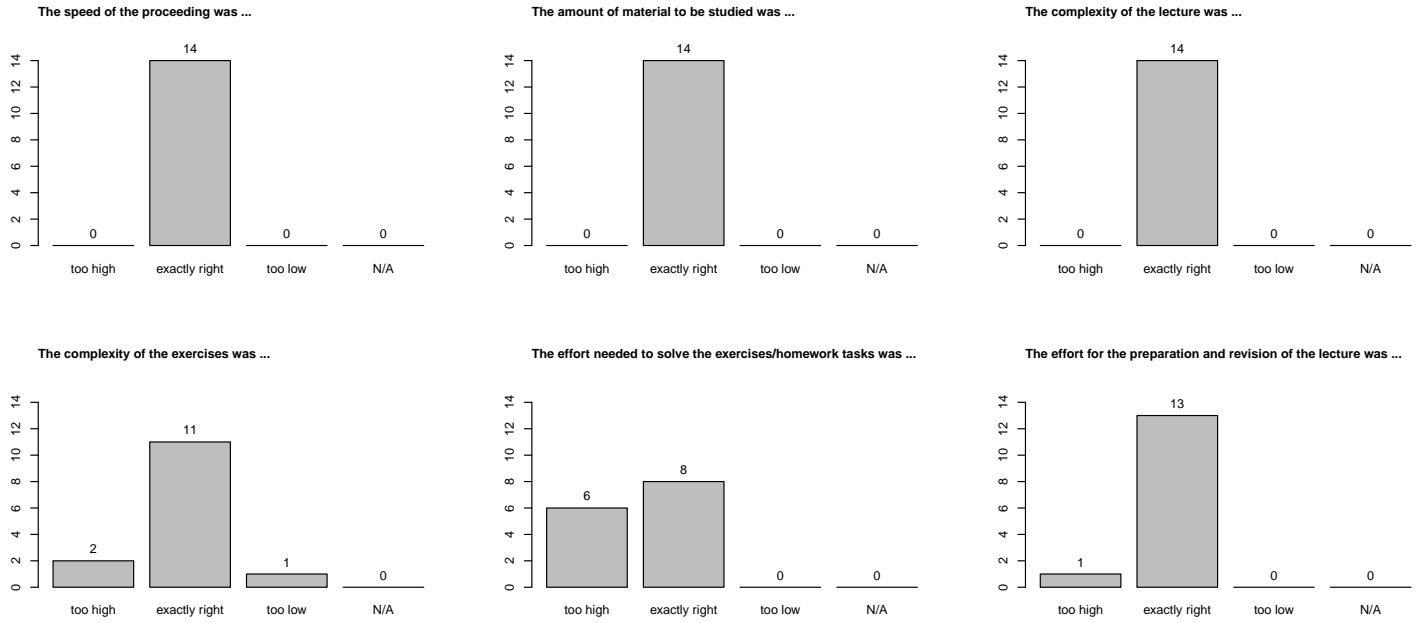

2 Please rate the organisation of the course.

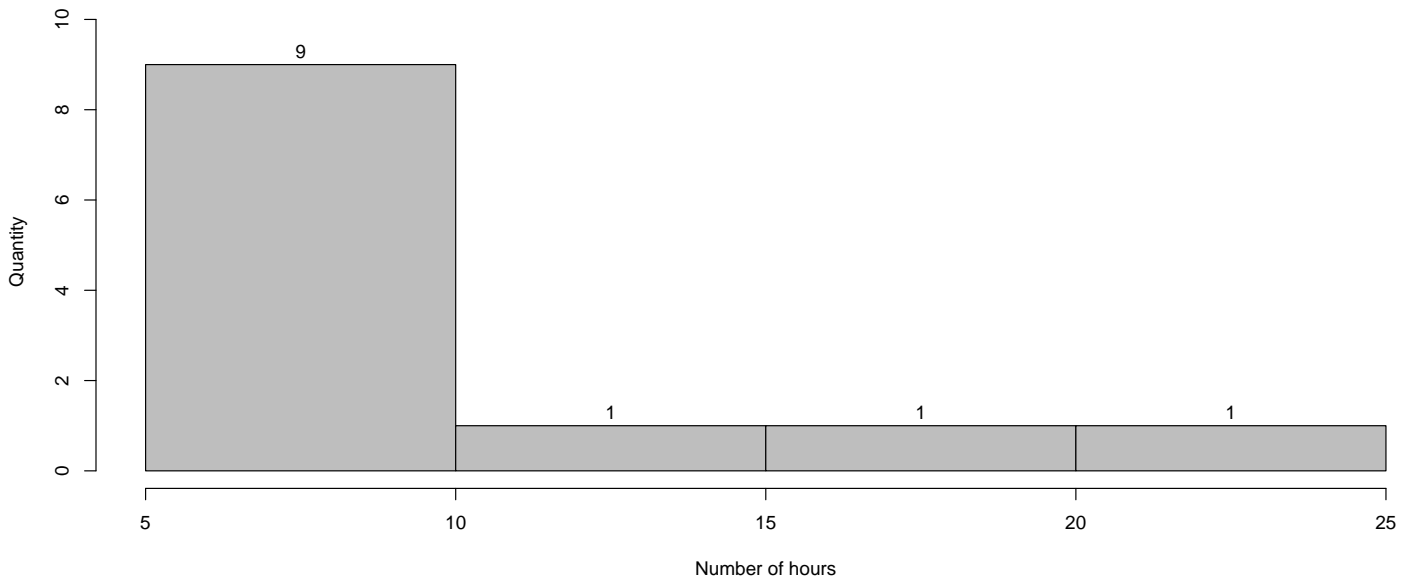

3 Please rate how the following statements fit your opinion.

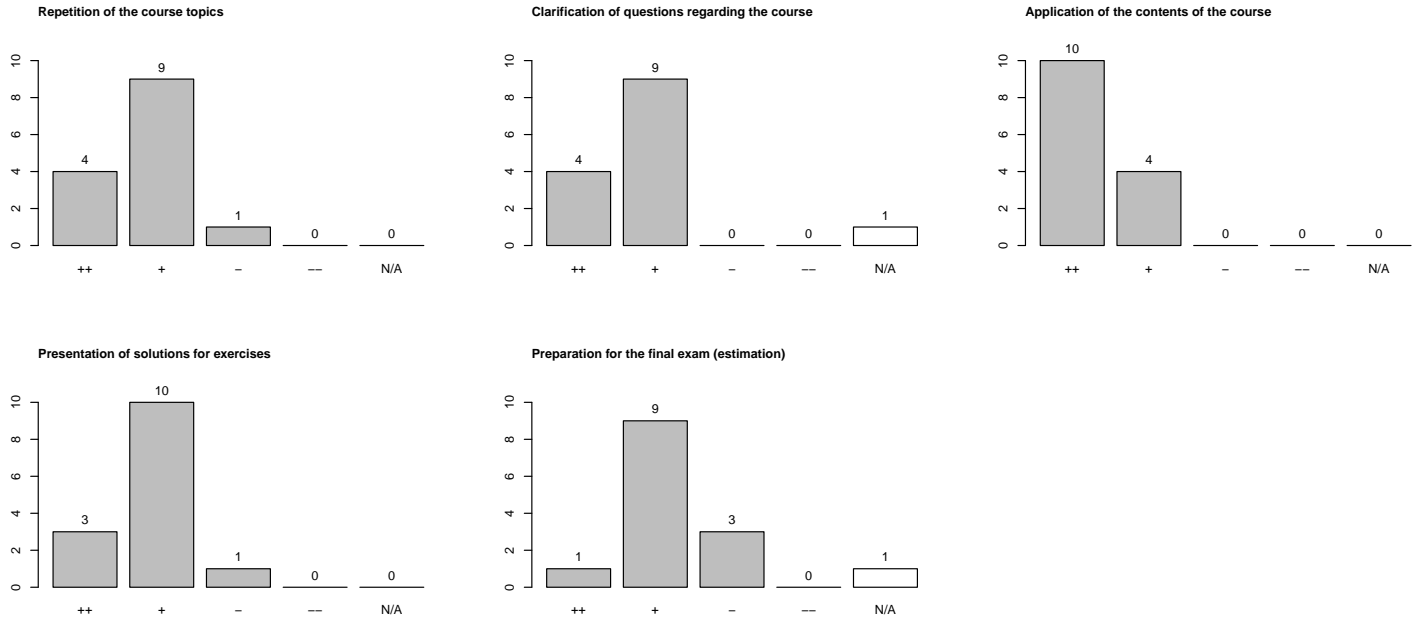

4 Please estimate the effort and complexity of this course.

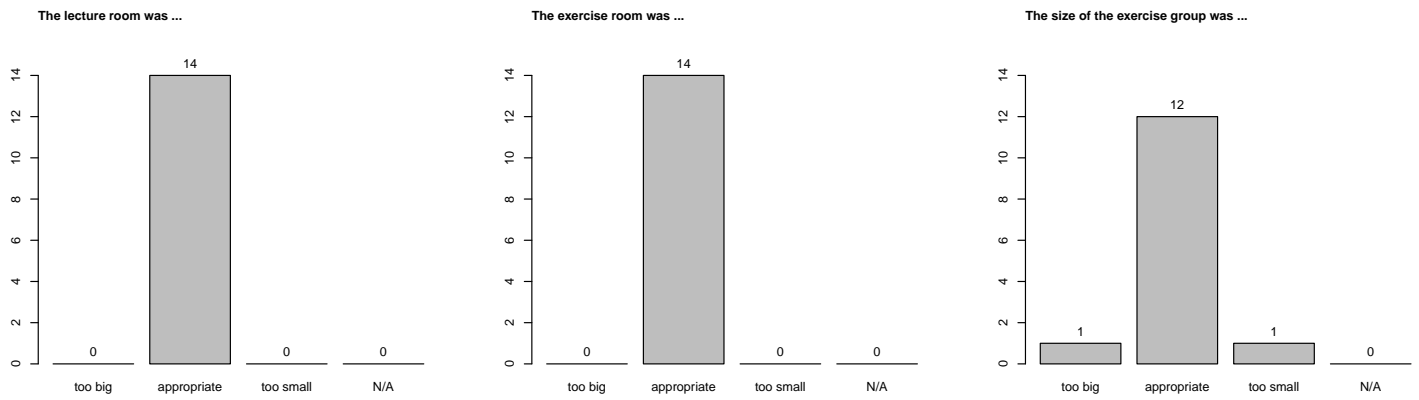

5 How many hours per week did you spend on this lecture (including the visit of the lecture and exercise groups) on average?

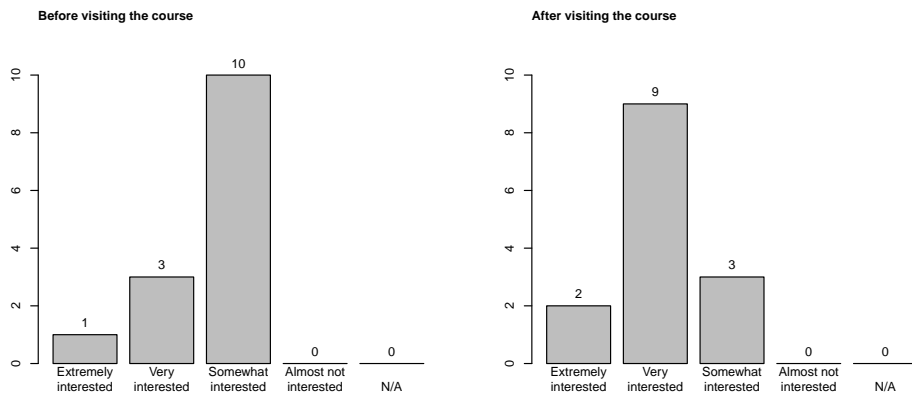

6 Please assess the value of the exercise groups to help understanding the presented topics.

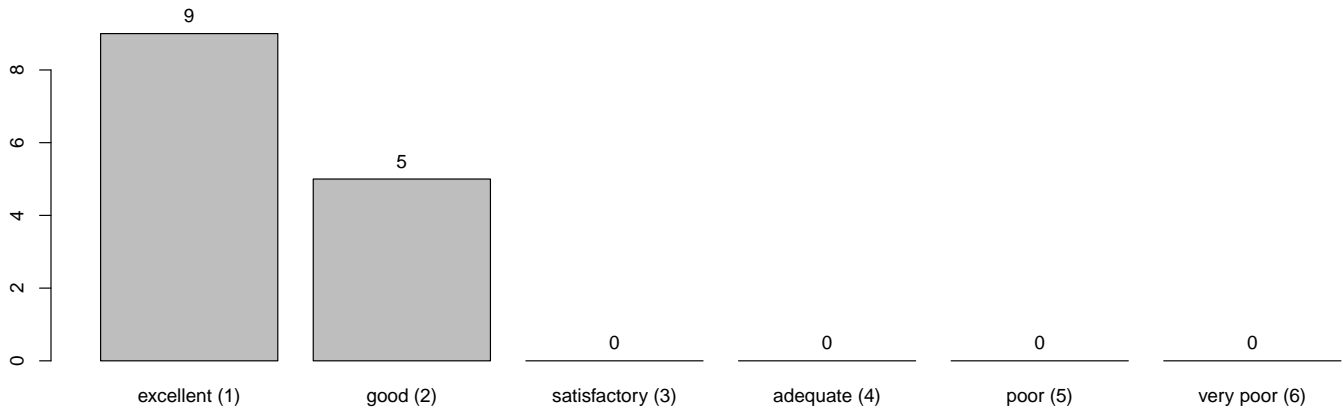

7 Please rank the size of the rooms and exercise groups.

8 Please compare your interest in the topics of the course before and after visiting the course.

9 Please give an overall rating of the course on a scale from excellent (1) to very poor (6).

10 Comments

Which things of the course did you like?	What could be improved?	You can leave remarks and feedback to our survey here.
Overview of an area which is really important. Good Lecture Structure	Exrecise session tutor should be more adequate	
i really liked the fact that it was based strictly on the book(More lectures should do this!). i liked the structure that we should read the chapters beforehand, so we weren't overwhelmed by new information in the class, but instead could get a better comprehension of the material		
differemt learning method with textbook in advance. interestingand motivating lecture. learning new programming language and frameworks	time amount of the practical exercises	more replies because of the hand-outs were a good-idea
Attitude of the lecturer	Course materials	
Good inclusion of given literature. Prof gave inspirational talks/ outlook into future. Interesting programming tasks; learned new programing languages	reduce the worklad of practical assignment a bit	
practical exercises. the fact that the things showed in the lecture are applicable in real life. the relaxed mood of the lecture	more practicalexercises or bigger projects/teams	
that there were slied and a paper reference (in form of the book)	Later!	Your survey is too long!
Interesting concept		
Intersting topics. Humorous Lecturer. Sufficient Practice	Maybe more illustration	
Clear explanations of the topics. Very interesting practical exercises	Some study materials can be added (like slides)	

<p>The Lectures were relevant and always interesting. The exercises were challenging and also interesting to do. The Examples given during the lecture were always helpful and picturesque</p>	<p>In my opinion, students should be given more time for the practical assignments, since learning a new framework and for a new programming language takes more time than given</p>	
<p>Lecturers method of teaching, his unique & lovely way to solve students problems and his knowledge of delivering Sype (*unleserlich*). Almost everything regarding Lecture</p>	<p>There may be video Recording of lecture be available to students and lecture timing may be a little bit later as it is difficult to get up early in the morning</p>
