

SS 2013

# Advanced Topics in Computer Vision: Cognitive Computer Vision

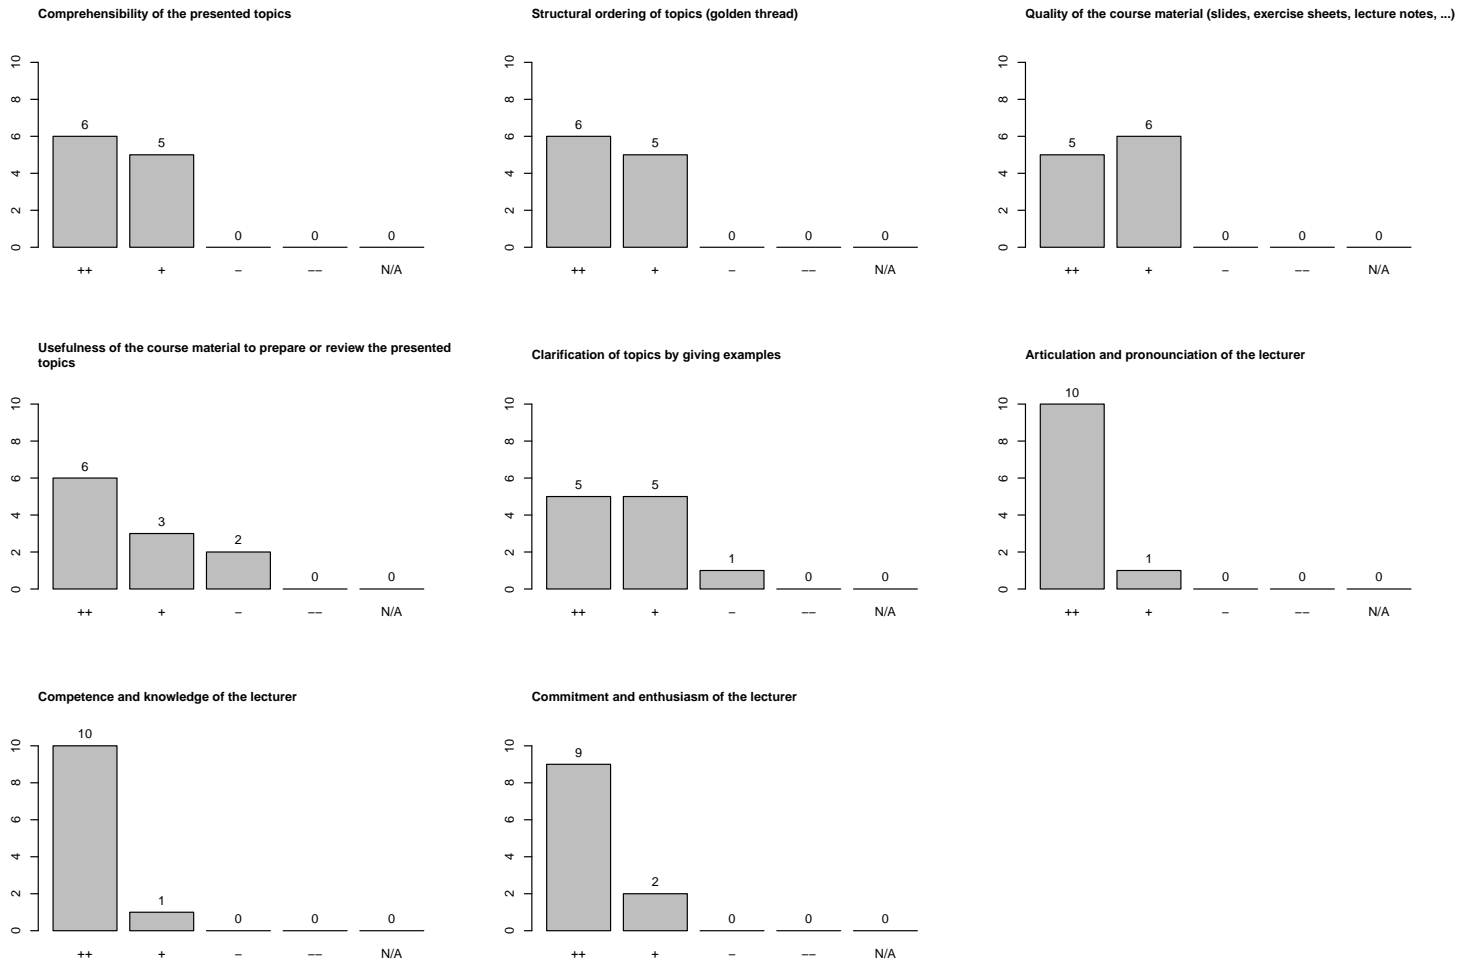

DR. SIMONE FRINTROP

Average grade: 1.7

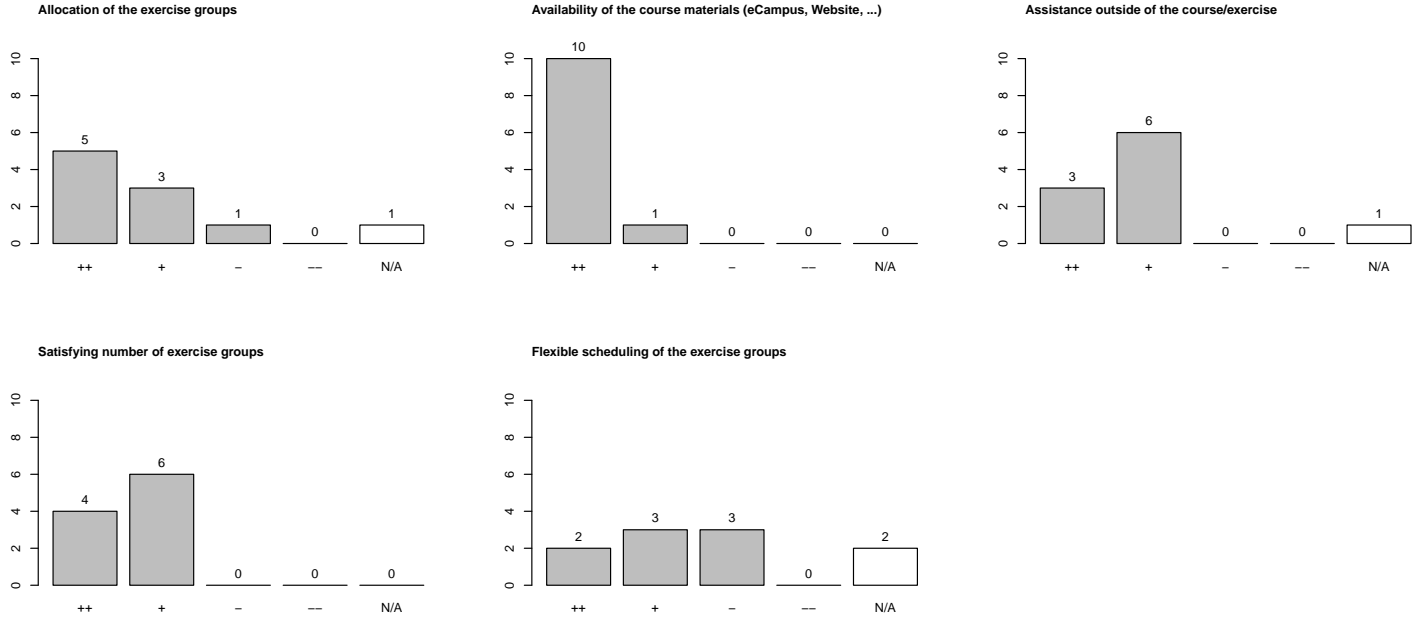

Participants (evaluated survey sheets): 11

- Bachelor: 0
- Master: 10
- Diploma: 0
- Lectureship: 0
- Minor subject: 0
- FFF: 1

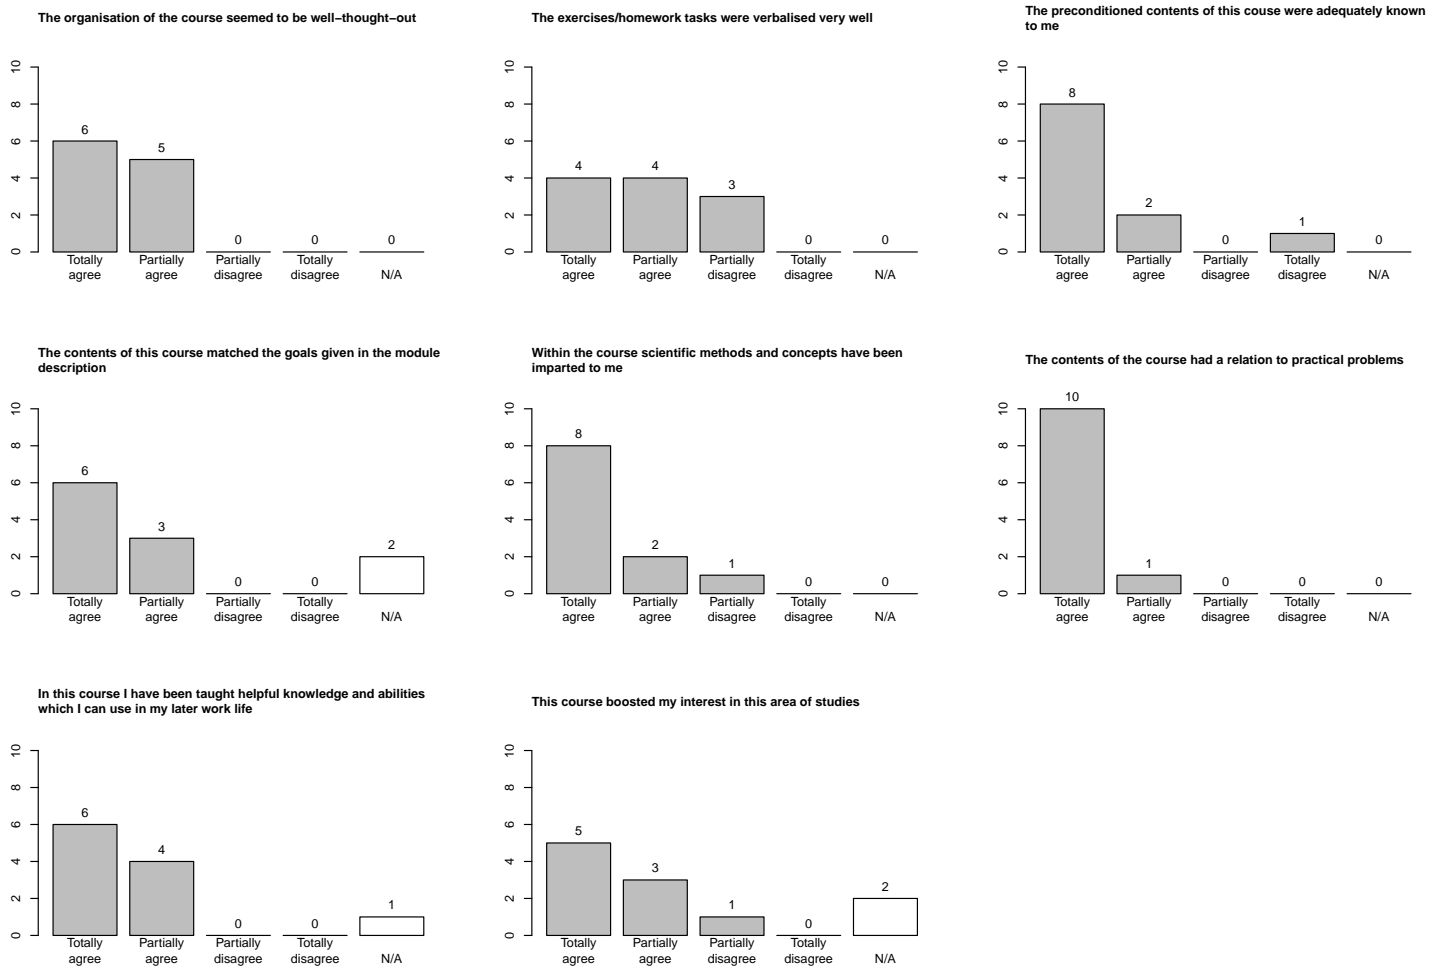

## 1 Please rate the quality of the lecturer's teaching.

## 2 Please rate the organisation of the course.

## 3 Please rate how the following statements fit your opinion.

4 Please estimate the effort and complexity of this course.

5 How many hours per week did you spend on this lecture (including the visit of the lecture and exercise groups) on average?

**6 Please assess the value of the exercise groups to help understanding the presented topics.**

**7 Please rank the size of the rooms and exercise groups.**

**8 Please compare your interest in the topics of the course before and after visiting the course.**

9 Please give an overall rating of the course on a scale from excellent (1) to very poor (6).

## 10 Comments

Which things of the course did you like?	What could be improved?	You can leave remarks and feedback to our survey here.
practical assignments	speed of processing, at first was right, but at the end, became too fast.	
-	-	-
The lecturer is very knowledgeable and passionate about the topic of the lecture and her research field. Therefore I became very interested in the topic myself as a student.	The exercise sheets can be slightly improved by making the actual tasks more clear.	
Logical structure of the course		
The topics in the lecture were really well explained and showed a lot of examples to make it easier to understand	They should give hints for the exercises for things that can possibly give you wrong answers and need to apply a function to that answer not explained in class.
