7 Free text comments

7.1 Which aspects of the course did you like?

The whole course is very good and practical implicatiores

the fact that it is reaistically iportant for my future work area

good topics
practical things very prepared professor with experience

The lecturer demonstrated a good knowledge of the course and he has shown us a lot of practical examples.

7.2 What could be improved?

The cource is highly practical and contents are too much.
It should be seperated into enterprice Inf.System and Advanced Info Systems

the slides contain at times very small text with out vissible formating

the tutors are not so good more real examples of real business

the tutorials were not that good as the lectures

all the slides are like notes and thy are not really enough for learning
there is no explanation in the slides

Exercises. They shouldnt be just about how to install and follow tutorials of Aris

translate the slides or questions better from Germanversion.

7.3 You can leave remarks and feedback to our survey here.

survey should be after exam

there should be more courses of this field
