6 Comprehensive Rating

6.1 Please give an overall rating of the course on a scale from excellent (1) to very poor (6).

7 Free Text Comments

7.1 Which aspects of the course did you like?

Content.

Professor

-
- state of the art topics
 - Explanations were clear most of the time.

-
- Well aligned theory
 - Ready workspace for practical projects

The topics were taken from papers with interesting results.
The examples were illustrative.
There were practical aspects in the course.

The programming part was explained very good and midterm is necessary in my opinion. The course is not too complicated and structured very good.

The topics are very relevant.

7.2 What could be improved?

Put the slide online before the lectures

Most complex topics would require more time in the lectures.

-
- Architecture part could be more demonstration based
 - newer technologies could be covered
 - more adequate examples and exercises would rise the interest to the architectural part

- Structure of the course:

- Sections were not clear for first part.
- Too many proofs for second part.

The exercises should include a thorough overview of the lectures rather than just briefly solve the exercises.

Probably, a theoretical part should be a bit faster, nevertheless slides were good

The lecture notes for the first part (Dr. Mock) are not well suited for studying. Need more explanations.

7.3 You can leave remarks and further feedback here.

Time series related architecture would be interesting to include in materials.

Mandatory course achievements

- joining an exercise solution group
- active contribution to the solution of all homework assignments in the exercise solution group
- regular submission of the exercise group solutions (in written form for the theoretic and algorithmic tasks and electronically for the programming exercises)
- up to the date where the admission decision is made: achievement of at least 50% of all possible points that can be received for the solutions submitted and for the oral presentation of the programming exercises
- passing of the mid-term exercise checkup
