## 6 Comprehensive Rating

### 6.1 Please give an overall rating of the course on a scale from excellent (1) to very poor (6).

## 7 Free Text Comments

### 7.1 Which aspects of the course did you like?

Content  
and Pr. Horvath  
explanations

---

Thank

---

Interestingness of the topics.

---

Prof. Wrobel's explanations

---

- The Topics covered
  - Exercise questions
- 

Wrobels English

### 7.2 What could be improved?

- some examples are not clear or they are missing, especially the notation for the exercises is not provided
  - some variables are not defined, e.g. ext()
-

The pace at the end of the lecture is too fast.  
This should be more evenly distributed over the whole semester.

---

Slides of Dr. Wrobel - too much illustrations that hardly give any understanding to algorithms in slides.

---

# of exercises should be more and more easy examples may be explained during lecture

---

If the slides are more clear - this would be great. It feels like the slides sometime are unstructured or out of the topic

---

Some complex topics should be explained with more time in the lecture.

---

- Slides could be better written / more lucid.

---

Exams times are not enough.

---

More time in the midterm to solve the tasks

---

The midterm

---

remove [redacted] worst tutor ever

---

The tutor was bad to understand and graded the exercise inconsistently.  
Alternate solutions were not accepted.

---

### **7.3 You can leave remarks and further feedback here.**

A lot of strange and not understandable content in lectures of Dr. Wrobel, not clear labeling and formulas without sufficient explanations

---

Best of luck :)

---

for guest students, we only get 4 CR. However the load for this subject is kinda much versus the actual load. Would be great if it counted as 6 CR

# Mandatory course achievements

- joining an exercise solution group
- active contribution to the solution of all homework assignments in the exercise solution group
- regular submission of the exercise group solutions (in written form for the theoretic and algorithmic tasks and electronically for the programming exercises)
- up to the date where the admission decision is made: achievement of at least 50% of all possible points that can be received for the solutions submitted and for the oral presentation of the programming exercises
- passing of the mid-term exercise checkup

## Lecturers' Questionnaire

This part contains data provided by the lecturers.
