7 Free Text Comments

7.1 Which aspects of the course did you like?

Most aspects

Content and this course covered wide range of computer vision topics.
we learned a lot of new things

Pretty pictures

topics covered are very interesting.

7.2 What could be improved?

Less content but more deeper in the content
Slides are poorly made and sometimes notations are not consistent.

The lectures were too fast and it should be a small 5min break in the middle.

So many symbols, so few definitions :(  
More labeling of the symbols would be nice I think

- lecture slides are not helpful.

7.3 You can leave remarks and further feedback here.

The lecture started too early.

The slides needs to be modified to make it clear and sometimes it is hard for following.

Most of the exercises were practical while the final exam would be all proofs and theoretical. We should have more theory exercises.
