7 Free Text Comments

7.1 Which aspects of the course did you like?
I really enjoyed the rendering exercises! I was a lot of work but really rewarding!

7.2 What could be improved?
I think that the work amount (for only 6 eats) is too high. I’ve spent roughly a day coding these assignments, plus 2 hours exercise, plus 3 hours lecture (to which I mostly didn’t go, but I work a lot so that’s my own fault/guess) totals ~13 hours. That’s quiet a lot.

7.3 You can leave remarks and further feedback here.
I would have preferred if both parts of the module (rendering/geometry) would have had seen counted together point wise. By the point (in time) that we would have reached 50% most people already dropped out of the lecture and I would have appreciated to be able to finish the exercises without
being worried about getting the points...

4 Free text comments

4.1 In your opinion, what aspects of the module worked well this semester?
Students had knowledge in C++ but lacked knowledge in scripted languages

4.2 What would you change if you were to offer this module again and why?
Exercises in only one programming language

4.3 In case there have been obligatory course achievements: Please judge on their effectivity regarding the learning success of the students.
Effective but there is an overhead, dealing with frameworks

4.4 Further remarks
