Lecture Survey – Fachschaft Informatik

May 8, 2019

1 Lecture Evaluation

1.1 Please rate the lecture's concept.

1.1.1 How often did you attend the lecture?

Always – Never	52%	41%	3%	3%	0%
Answers: 61 Mean: 1.6					
Standard-Deviation: 0.7	1	2	3	4	5

 $53\,\%$

1.1.3 Have topics been illustrated by sensible examples?

Always - Never

Answers: 64 Mean: 1.6 Standard-Deviation: 0.8

1.1.4 Were the slides/lecture notes helpful?

Very helpful – Not helpful

Answers: 65 Mean: 1.4 Standard-Deviation: 0.6

59%	38%	3%	0%	0%

3

3

1.1.5 Have the topics been explained extensively enough?

Always – Never	46%	43%	9%	1%	0%
Answers: 65 Mean: 1.7					
Standard-Deviation: 0.7	1	2	3	4	5

2 Lecturer Evaluation

2.1 Please rate Dr. Nils Goerke (durchführend).

2.1.1 How much of the content do you understand during the lecture?

Everything – Nothing	18%	68%	12%	1%	0%
Answers: 65					
Mean: 2.0					
Standard-Deviation: 0.6	1	2	3	4	5
2.1.2 Did the lecturer answer your questions profoundly?					
Always – Never	69%	21%	8%	2%	0%
Answers: 62					
Standard-Deviation: 0.7	1	2	3	4	5
2.1.3 Was the lecturer available for questions outside of the	e lecture	?			
Always – Never	65%	18%	12%	5%	0%
Answers: 60					
Mean: 1.6			-		
Standard Deviation, 0.0			I	I	I
Standard-Deviation: 0.9	1	2	3	4	5

3 Module Evaluation

3.1 Please rate the module as a whole.

3.1.1 Did the course teach you helpful knowledge and abilities that will be useful in later work life?

Much – Nothing	37%	41%	21%	0%	0%
Answers: 65 Mean: 1.8					
Standard-Deviation: 0.7	1	2	3	4	5

3.1.2 Do the obligatory course achievements support successful completion of the module?

Yes – No	52%	34%	10%	2%	3%
Answers: 62 Mean: 1.7 Standard-Deviation: 0.9		2	3	 	5

3.1.3 Do you think the obligatory course achievements are adequate?

Yes – No	52%	28%	18%	0%	2%
Answers: 61 Mean: 1.7					
Standard-Deviation: 0.9	1	2	3	4	5

3.1.4 Did your interest in this module's field of study change?

Strongly inc. – Strongly dec.	32%	35%	32%	0%	0%
Answers: 65 Mean: 2.0					
Standard-Deviation: 0.8	1	2	3	4	5

3.1.5 Would you recommend taking this module to your best friend?

Yes – No	62%	25%	11%	0%	3%
Answers: 65 Mean: 1.6		-			
Standard-Deviation: 0.9	1	2	3	4	5

3.1.6 In relation to the number of credit points awarded, is the amount of work to be done justified?

3.2 How much time did you spend on this module every week, including lecture, exercises, exercise tasks. . . ?

4 Exercise Evaluation

4.1 Please rate the quality of the exercises that accompanied the lecture.

4.1.1 How often did you attend the exercise class?

Always – Never	37%	35%	12%	3%	12%
Answers: 65					
Mean: 2.2 Standard Deviation: 1.2					
Standard-Deviation: 1.5	1	2	3	4	5
4.1.2 Have the exercise sheets been available on time?					
Always – Never	86%	11%	2%	0%	2%
Answers: 64					
Mean: 1.2					
Standard-Deviation: 0.6	1	2	3	4	5
4.1.3 The difficulty of the exercise sheets varied

7 Free Text Comments

7.1 Which aspects of the course did you like?

Structure of the course and lectures

lecturer explained the concepts very nicely

Professor Explanation varity of topics

Interesting topics and useful slides

sensible examples

Professor made some points clear, which I learnt during another courses but didn't understand them completly

Dr Goerke is a very good lecturer

continunity of content

Course contents were excellent

Good presentation skill of the professor

MLP, RBF, Recurrent MLP SOM Recognition

The MLP, RBF, SOM, Neural gas was described to depth

Lectureer's representation and his slides are really helpful

Wide coverage of described topics

I like the structure and topics. Also the detials of the topics are just okay

- topics covered

- repeating

Lecture classes

clear presentation, great lecture notes

Great explanation about the content and very useful slides and interesting homeworks

I loved the slides, very clearly laid out and good at explaining concepts in class. I understand shared topics from Machine Learning much better from TNN slides

Machine Learning

Good exercises

Backpropagation explanation/derivation Guessing numbers with Nils

the way Dr. Goerke presents the lecture the variety of content presented

Variation in discurssing different methods

Dr. Nils Goerke expresses himself verbally perfectly. Slides are really straight forward and clear

7.2 What could be improved?

little less content will be helpful

bigger lecutre hall if the lecture stays at 12pm

deal with the tiopics deeply

Model solutions of the PAs and some explanations in the exercise. The feedback of the PAs was not helpful

 topic

Too much for a 6 credit course and also the slide is too much

Bigger lecture hall and smaller exercise groups

The exercise group is too big and the tutor speaks broken English

Explanation of mathematical terms too deeply

More visualized explanation could be shown on the board

Exercises could be more useful sometimes (sometimes it was just writing into from slides)

Reinforcement learning, CNN

The Reinforcement learning can be improved

More practical part. For students to really have handson experience

exercise tutoriums not very good. Tutor was not always clear

Giving more real time examples of the Network paradigms derived

The content is pretty outdated

bigger lecture hall

Too much homework

Perhaps go a little bit deeper in the explanation of some paradigms in TNN

Perhaps real world applications or examples like code or interactive models available to us outside of lecture to improve self study

Exercise class solution should improve

Lecture was a little bit overload

The location of the lecutres

- too crowded, too small

- the room seperation makes it hard to see what's written on the board sometime

- more focus on examples
- less focus on dates or the people who have done the research in past!

Discussing more thoroughly the more modern topics (more of conv-nets, different optimizations and layers)

More currently used techniques explained during the lecture

- exercise classes

- slides could be handed before lecture, so we could prepare

- solutions for exercises could be announced on website. Because exercises are not in understandable format in lecture. Simply exercise classes are waste of time

7.3 You can leave remarks and further feedback here.

No

Not every TNN that is historically relevant is still relevant today. Maybe a shift of focus would be appropriate

 Good

Generally course was great. Thanks

I think learning formulars and derivations by hand is a poor way of testing the understanding of the subject
