7.1 Was hat dir an dieser Lehrveranstaltung gefallen?

This year I would have appreciated if the professor did record the lecture. It would have been helpful to have them since some time there was some bad internet connections and I might have missed some important information.

- tutorial by Leif - practical relevance

Many aspects covered including theoretical considerations that are often left out in other courses.

Interesting topics Great tutorial, even at 6 pm after a long day of lectures with very comprehensible solutions The lecturer was open for feedback on the exam planning Additional materials were provided (summary of topics, exemplary questions,...)

7.2 Was könnte noch besser gemacht werden?

- live coding in the tutorial takes up a lot of time. Is it really necessary?

- structure of the lecture - some parts seem to be copy-pasted from the Deep Learning book, sometimes it seems that the context from the book is missing

Maybe concentrate on a smaller number of topics but more in-depth. Learning things by only scratching the surface is not that helpful in practice.

exercise sheets could be less " ugly calculating" . Don't change submission days of exercises (Sunday-Monday), that is very annoying and confusing! Exercise submission groups of 5 persons are far too big.

The tutorial organization was a little unclear in the beginning The exam organization was kind of messy due to the corona situation

7.3 Hier hast du Platz für weitere Anmerkungen und Feedback zum Modul.

The programming tasks were a bit more work, especially at the beginning. Exercise sheets were created during the semester and sometimes had mistakes, but those were usually fixed very fast
