6 Abschließende Bewertung des Moduls

Note:

6.1 Hälst du die Vorlesung der Dozent:in für lehrpreiswürdig und falls ja, warum?

yes. apart from some moments when the pace was too slow, the course was excellent. The teacher's excellent intention to make us understand the knowledge is very clear

7.1 Was hat dir an dieser Lehrveranstaltung gefallen?

The lecture was really interesting and nice to follow and the lecturer is very likable. I also like that you could apply the knowledge practically during the exercises instead of having just theory

The enthusiasm of the lecturer for the module was kinda contagious. It was interesting to have some practical applications with cameras during some exercises.

The course covered interesting topics and the lecturer seemed enthusiastic.

I really like the topics and the practical exercises in the lecture and for home.

Access to the old recordings was very practical.

7.2 Was könnte noch besser gemacht werden?

The lecture slides are a little cryptic if you have missed the lecture or want to revise a few weeks later. Then it is really hard to follow, because a lot of interesting stuff is said during the lecture and you have to be there to catch it. The pace is generally a little too fast for me to take notes, so I have to rely on my memory. At least there are lecture recordings, which I love btw, and that help me during studying

A bit better time management

Organization of the module was very chaotic, with not finished sets of slides during the lecture and spontaneous cancellations of tutorials (one time cancelled at the beginning of the tutorial time). During the absence of the Tutor some questions weren't answered the last week. Also we didn't get any feedback for weekly assignments when 3 weeks of tutorials were cancelled.

For some exercises it would've also been nice to have a better reference of what was expected and consideration of some pitfalls for what can go wrong and perhaps how to handle them.

The organization. The tutorial rarely took place and that fact was usually relayed to the students way too late on the morning of. The exam dates were decided on too late, leading to confusion.

The organization of the course was a bit chaotic. It would nice to get slides and exercises on time. Also, when there is no tutorial, it would be nice to get a note early, at least the day before. In addition, for the labs , it would have been very helpful to have the possibility to ask the tutor (tutor was on a conference) .

7.3 Hier hast du Platz für weitere Anmerkungen und Feedback zum Modul.

Definitely keep the lecture recordings in the future!! They are a life saver. And please, use the Discord Channel more. This week was a little frustrating bc we had a lot of questions regarding the project and the deadline (which there was no ecampus link for) and nobody answered. That was a little anxiety inducing lol
