Note:

Hältst du die Vorlesung der Dozent:in für lehrpreiswürdig?

### 6.1 Wieso?

Some of the guests were not extraordinarily good. It was overall a nice introduction and overview of the topic.

Modul macht viel Spaß, man lernt viel, Vulnerabilities of the day sind sehr cool, Abteilung USCAP weiter so

concepts explained very well and in a very engaging way with examples. it had many practical relevance as well.

Pro: Positive Admosphere, Lecture is fun BiBiFi is fun! Con: Content is not challenging
Because he was clear and communicated well. Also tried to answer all questions.
Because it was very nice to connect theory and practice. Also online plenum + recordings
I loved the BiBiFi. The content of the lecture is very relevant. I respect and would like to thank the lecturer(s) for clear - self-explanatory slides.
The lecturer himself only held like 3 lectures, the rest were held by a tutor and some other people.

## 7 Freitextkommentare

### 7.1 Was hat dir an dieser Lehrveranstaltung gefallen?

Die Vilnerabilities of the day.
Das break it Projekt
einfacher Einstieg in und Überblick über IT Sec Themen möglich - auch für Studis von schwerpunkt-fremden Gebieten
Die Übung bzw. das Build it, break it, fix it Prinzip.
practical relevance
Hybrid format and videos are great! Vuln of the day are great. I'd like more of that
Big project as the exercise sessions. Online plenum, recordings after it.
- bibifi is a nice idea
Self explanatory slides - very helpful. Many lecturers don't have such slides. Also - the information density is spread decently even, compared to some other lecturers slides - where huge formula or algorithm with 0 explanation of variables and what they do. I also appreciate using the clear wording in the slides.
The lectures were hybrid and recorded, which is very nice.

### 7.2 Was könnte noch besser gemacht werden?

Vielleicht das praktische ausnutzen der Vulnerabilites of the day in einer Art Lab.
Break it Kommunikation gerade mit Hinblick auf Deadline und was in den Abgaben verlangt wird
language used was java, which was a bit difficult to follow at times.
Übungsblätter verpflichtend für die Klausurzulassung machen und Tutorien anbieten, so wie in den meisten anderen Vorlesungen.
Das Projekt um die Zulassung zu erhalten hat irgendwie keinen Zusammenhang zur vl
More credits.
topics more in detail instead of many broad overviews
- exam is in the middle of nowhere - exam is e-exam and still in person - ich muss zur Klausur wandern?? (am Wanderweg Naturpark Melbtal)

To increase the value of the work of people who worked hard on bibifi - i would recommend adding a "kicking team member out" option in bibifi. Because I had to do almost all of the work in bibifi - but my team is of 4 people (incl. me). I would gladly change some team members to the people I would have known better later.

The Bibifi contest is a nice idea, but it is very time consuming and doesn't prepare for the exam at all. I would have found it better if there had been normal exercise sheets which were also corrected so that you felt better prepared for the exam. The entire module is very superficial, but contains a lot of topics that are simply clapped together. It would help to remove some topics and cover others in more detail. As it is now, it just feels like you're memorizing long lists, but there's not much to understand it in depth.

### **7.3 Hier hast du Platz für weitere Anmerkungen und Feedback zum Modul.**

Just saying i had one person in team basically freeloading, but it was impossible to remove him, he was the owner of the git repo
