## 6 Abschließende Bewertung des Moduls

Note:

Hältst du die Vorlesung der Dozent:in für lehrpreiswürdig? Falls ja: wieso?

### 6.1 Kommentar

He was clearly very passionate about the material, easy to understand, and gave the impression that he cared about the students and our learning progress.

He is very good in explaining seemingly complicated mathematical stuff in a very structured way. Also the design and structure of the lecture is excellent.

## 7 Freitextkommentare

### 7.1 Was hat dir an dieser Lehrveranstaltung gefallen?

explanations on the board (much better than only powerpoint), the quality of the explanations in general, doable exercises and enough time for them, much better lecture hall than the Hörsaalzentrum. Thank you for the lecture!

The way of teaching.

### 7.2 Was könnte noch besser gemacht werden?

the time slots are suboptimal—it can be hard to concentrate so late in the afternoon; moreover, the pace of the lecture was too slow in the beginning, when there was a lot of repetition, and has been too fast in the last weeks: I could hardly follow during the last couple of lectures

Some parts of the lecture felt very rushed towards the end. The speed of the lecture needs to be adjusted a little, such that students can more easily follow the explanations. The lecturer often gives an intuition for what he is talking about, which is really good, however the connection to the more mathematical part isn't always clear; the lecture ended up being rather hard to follow in the latter half of the semester, after starting off very good.

There is nothing to be improved. But the exam question topic is too much. It's feeling too much pressure during the exam to cover everything.

### 7.3 Hier hast du Platz für weitere Anmerkungen und Feedback zum Modul.

The course and content as good. But it would be better if the topic was short for the exam.
