6 Free Text Comments

6.1 What did you like about this module?

- Practical applications
- Medical foundation
- Necessary ground work for all algorithms was provided, no strong prior knowledge needed
- Fascinating and relevant topic

Lecture pace, provided examples and amount of material presented

The real world applications

6.2 What did you not like about this module?

6CP for this module is too little. The course has 150% of the usual amount of lectures for a 6CP module (3 lectures in two weeks rather than 2 lectures). This is compensated by only having an exercise every two weeks, however, an exercise sheet in this module is twice as long as a usual per-week exercise in other courses, which results in the same amount of work.

It would be slightly more comfortable if the module weighted 9 ECTS

It was a lot of content for a 6 credit course

6.3 What could be improved in the future?

You could turn this into a 9CP module

6.4 Here you have space for further comments and feedback on the module.

We would appreciate if the lecture slides were not changed at the last minute or we have already begun the chapter, as many of us like to download them beforehand and takes notes on them during the lecture.

6.5 Here you have space for comments and feedback on the design of the evaluation survey.

The evaluation survey is conducted before I start preparing for exams, so "do you feel ready for the exams" is a rather strange question
