6 Free Text Comments

6.1 What did you like about this module?

| |
|---|
| Praktische aufgaben mit emulatoren, chips etc |
| Amazing and relativiley up-to-date content, content about very important and current issues, very competent lecturer, practical application of modern (rather complex, so amazing we can do it in practice) content |
| The attention the lecturer gave to answering the questions were very nice, especially for me, since I had a lot of difficulty understanding some of the topics. |

6.2 What did you not like about this module?

Part of the structure and the topic's relations to one another were only clear near the end (Why do we learn covert side channels so early and their application so late?) The exercise session often felt like if no one had a presentable solution, rather than explaining the process to get to one or show one the question would be skipped. As there were multiple pretty difficult exercises this resulted in either no solution/ a path to a solution being presented or someone showing 1/10th of a solution

6.3 What could be improved in the future?

A different or additional knowledge check (to simulate exam like questions without the exam like impact/stress) with extensive feedback on where one went wrong or lacked what knowledge (a path of what steps of thinking + what bits of knowledge and their source in the course material lead to a solution would be amazing
The example sites used in some of the excercises could be translated to English.

6.4 Here you have space for further comments and feedback on the module.

Overall so far my favorite module at this university! Finally the kind of content I was looking for when entering a cyber security field of study!

6.5 Here you have space for comments and feedback on the design of the evaluation survey.
