6.1 What did you like about this module?

| Praxisbezug war cool. Übungsaufgaben haben meistens sogar Spaß gemacht (wusste gar nicht dass das noch geht). Dozent ist cool und hat einen gut dabei gehalten und die Themen sehr gut rübergebracht. Tutorin ist super hat sich immer sehr für uns eingesetzt und bei Fragen die Themen gut erklärt und wenn sie gerade mal keine Antwort hatte dann hatte sie die in der folgenden Woche |
| The topic itself is very interesting and the lectures are very well presented. |

6.2 What did you not like about this module?

Fand manche Übungsaufgaben ein bisschen komisch gerade in der Mitte. Einmal sollte ein Graph für 400 Zeilen Code gemalt werden und einmal sollte man auf Infos zugreifen die es nicht mehr gab das war nicht ganz so schön
The whole topic of SSE is very interesting and applicable, I really liked the use of real world examples.

6.3 What could be improved in the future?

The lectures slides and exercises, were never uploaded on time, there was only one week that was not the case. So better organization on the lecturer in regards to that would've been nice.
And there are some slides that are not structured correctly or lose their structure in the middle of it.
For example, the slides for the lecture on Defensive Coding. We start going through an overview of the principles of defensive coding: Input Handling, Error and Information Control, Object Lifecycle Security, State Management, Data Protection and Boundary Control. Only Input Handling is properly addressed in the slides, with Error and Information Control and Object Lifecycle Security being indirectly touched upon, and all the other topics not being covered in a direct manner.
When in the lecture it is nicely presented, the subject is well covered and explained, but when later going through it again, makes studying it more difficult. So I do think this module would improve if it had more thought put into its structure.
