6.1 What did you like about this module?

Everything
The contents of the lectures were absolutely helpful in enabling my understanding of Natural Language Processing and have elevated my interest in the field
The practical project parallel to the lecture and exercise is a really cool idea! It's also cool that this part contributes to the final grade.
The tutor was also very competent.
Lastly the cookies at the Christmas lecture were a nice touch :)

6.2 What did you not like about this module?

The contents sometimes felt a little too advanced for me. Hence I had to put in extra hours to understand some concepts
The slides
The slides are aggregated from various sources. This is generally no problem (I also don't care about changing styles) It's just hard for taking notes during the lecture, if the slides were not uploaded (before the lecture) and it was hard to find a way to map the notes to a slide if the page number doesn't say anything about the real page number of the lecture...
The slide aggregation also lead to situations where a bunch of slides were just skipped mid lecture without a comment. So it's hard to know if this is relevant for us.

6.3 What could be improved in the future?

The slides
Spend less time on the „history“ part, explaining legacy ideas in detail to get to the current contents faster. I get it that understanding the basics is important, but maybe the concepts are enough?

6.4 Here you have space for further comments and feedback on the module.

The team was really responsive especially regarding the practical projects. And they really seem to care for us attendees and our feedback.

6.5 Here you have space for comments and feedback on the design of the evaluation survey.

Mark which fields will be published and which are confidential. E.g. our rating for the lecture award. For reporting uncomfortable situations.: „confidence“ is self-esteem. Right? „Confidentiality“ is secrecy. Guess here's the wrong word used.
